Stuyvesant Opportunities Bulletin

Overview:

We are creating an opportunities bulletin that will improve on the document that Mr. Blumm emails on a weekly basis. It will list internship and job opportunities that are available to students at Stuyvesant High School depending on filters that the user will choose. They will be able to filter the results based on location, grades eligible, areas of interest, when it was posted, and when they want to participate in the program. Using the calendar API, we will create a calendar that will list all application deadlines.

There will be two account types: student and admin. Only Mr. Blumm will have access to the admin account, which will allow him to post and delete opportunities. Any student can sign up for a student account, which allows them to view and save opportunities.

We will use Bootstrap.

APIs:

- Google Calendar API
[<https://docs.google.com/document/d/1atMCAui86AwBSWEz8lCIJFaNkUL4V5fwVecNcnxSpP0/edit>]

Minimum Viable Product:

- Login page where a student sign up, login, or use the bulletin board without the extra features a logged in user is given.
- Admin account will be able to fill out a form that posts to the main page with the most recent at the top.
- Admin will be able to delete opportunities.
- Student user will be able to save and view their opportunities.
- Button that redirects users to a calendar with events/deadlines.

Extra Features Given To Logged In Users:

- Will be given a personalized page with events/deadlines that only apply to them. Must first fill out their profile in the upper right hand corner.
- Will be able to click on a button next to all admin posts to add to their personalized calendar.
- Users will be able to react to posts with emojis allowed by the admin who made the post.

- Users will have a group users page to post to. Can only post once a day.
- Users will be able to reset their password in case they forget by entering in their OSIS and email as confirmation.
- Only allow users with a stuy.edu email address to sign up.
- Create a rating system for users to rate opportunities they have done in the past, which would be useful to potential applicants to that program.
- Add another class of users: teachers, who can suggest opportunities to include.

What We Will Need:

- Flask App with 7 routes
 - Login, Main, Calendar, Profile, User Main, Personalized Main, Personalized Calendar.
- HTML and Bootstrap
- Databases
 - User Information
 - Admin Posts
 - User Posts

Database Layout:

Students Users Table

User ID	Username	Password	OSIS	Email	Grade	Interests
0	Bob	asdf	213243421	asdf@stuy.edu	12	List of them
1	Brittany	hello	234910394	m@gmail.com	10	math

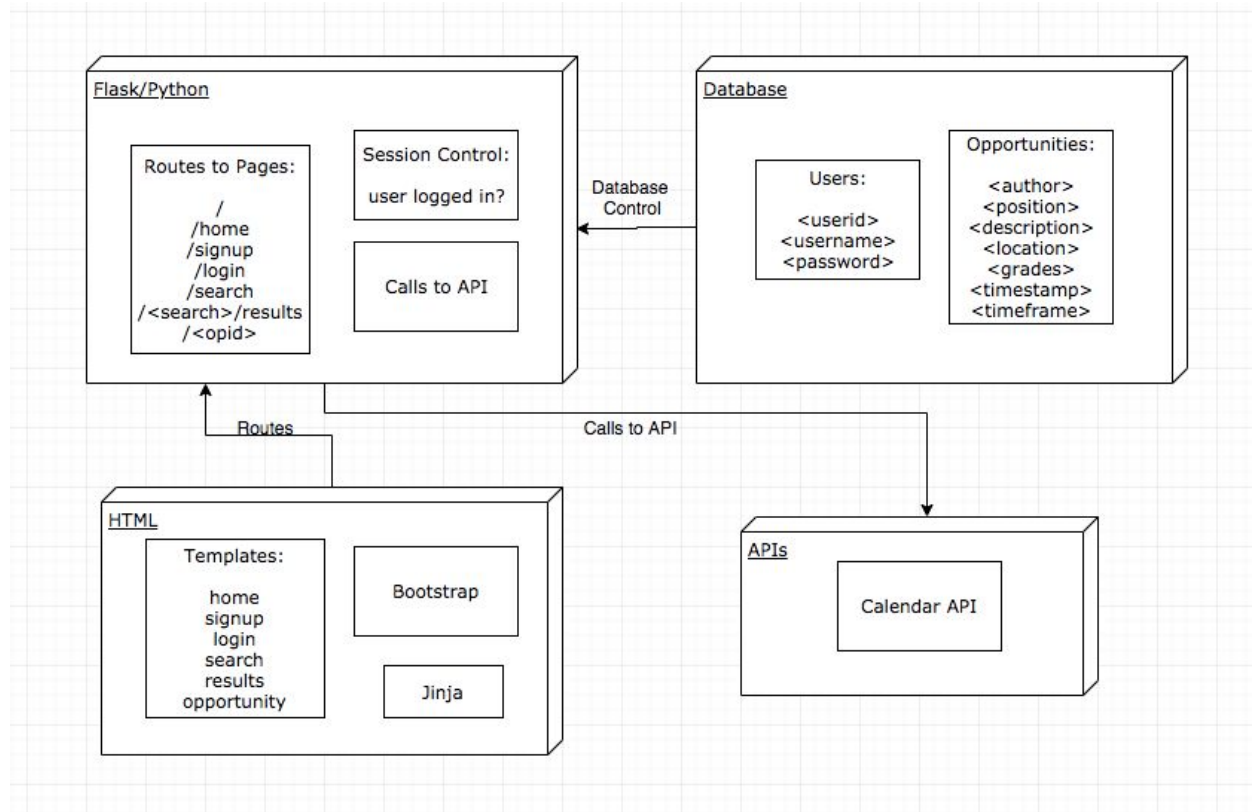

Admin Table

User ID	Account Type	Username	Password	Email
1	Admin	Mr_blumm	hello	blumm@gmail.com

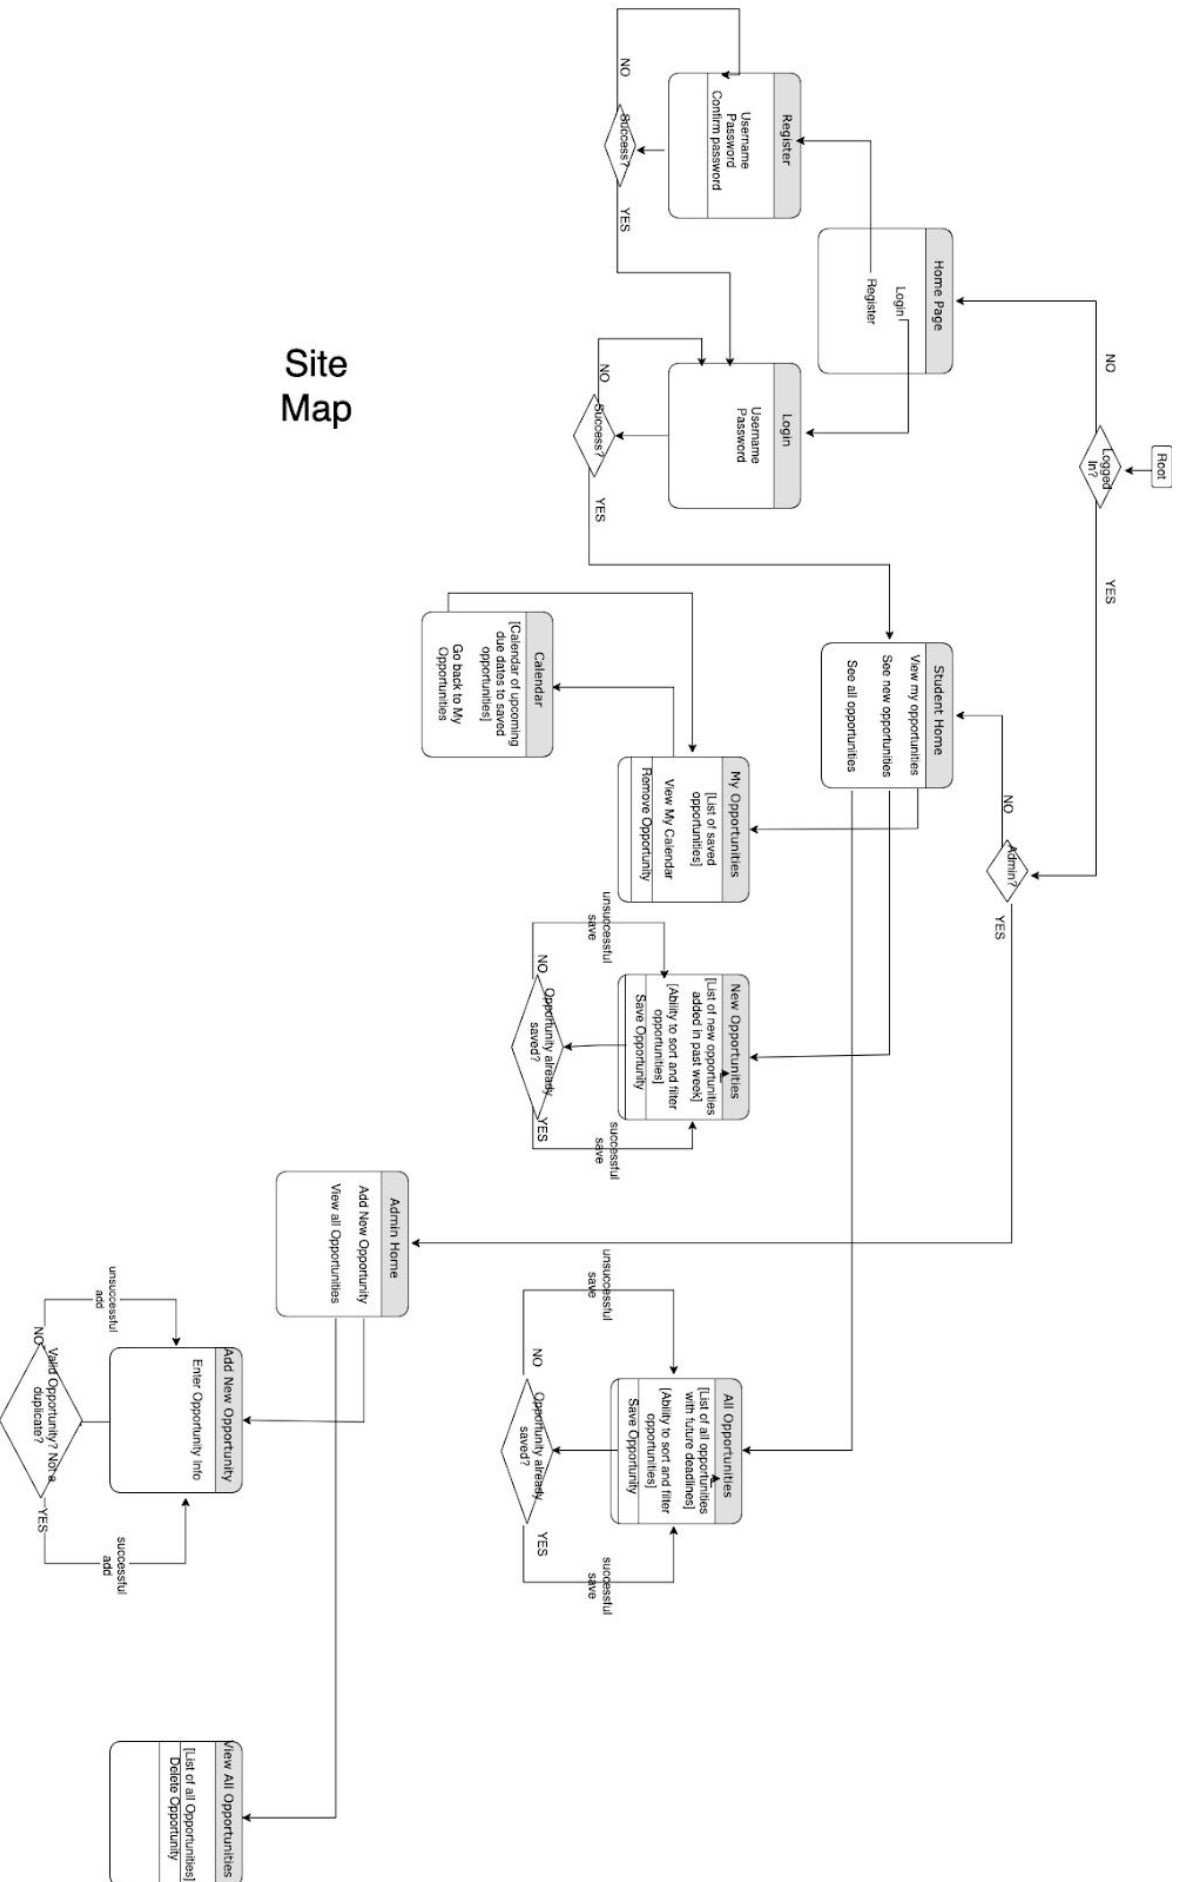

Opportunities Database

Post ID	Grades	Interests	Title	Body	Application Due Date	Opportunity Posted	Opportunity Dates
0	[9,10,11]	[CS, Bio]	Summer Research Program	somet hing	2020-04-03	2020-01-03	2020-07-01, 2020-07-30

Database Diagram:

Roles:

- Sophie:
 - Project Manager
 - Revise design doc
 - Assign tasks
 - Facilitate communication
 - Create cards for each API used to store in the Knowledge Base
 - Troubleshoot issues and complete minor coding tasks as necessary
- Jason:
 - implementing calendar
 - figure out how to use API
 - use database data to make calendar events
- Winston:
 - Develop admin account
 - Add/delete opportunities to collection.
 - Work on implementing filtering when viewing opportunities.
- Lauren:
 - Develop student account
 - Add/delete opportunities from Saved Opportunities.
 - Work on New Opportunities and All Opportunities page.
